Invasive Species Workshop

All species are not created equally! Please join us and learn how invasive species are poised to drastically alter our forested landscape. You can make a difference, but not if you can't identify and mitigate these invasive species.

When: June 28th @ 10 a.m to around 2 p.m.

Where: Parks Library, 6010 N Skeel Ave, Oscoda MI

What's going on: During this workshop you will learn how to identify, control, and mitigate the impacts of invasive species. A lecture portion will focus on invasive plant and insect ID while a field portion will focus on mapping invasive species populations, the role of citizen science, and practical control techniques .

Registration: this workshop is free of charge, however you need to register as space is limited. Please call District Forester Andrew Beebe @ (989) 335-1056 to register and for more details. Persons with disabilities are asked to register 2 weeks in advance so that proper accommodations can be made.
