Tree Sale Fundraiser

DESCRIPTION & PRICE LIST

April 27, 28 & 29, 2018
Friday, Saturday 9 a.m. to 5 p.m.
Sunday, 10 a.m. to 3 p.m.

Seedlings, Transplants, Shrubs, Small Fruit Plants and Fruit Trees Available

***A limited supply of excess trees will be available on site on the days of the sale.

Pick up orders at Tawas Inn
1124 S. US 23, Tawas City

10% Discount for orders placed by December 31, 2017
5% Discount for orders placed by February 15, 2018

**Orders are due by Friday, April 1, 2018**
CONIFERS

(1) **Austrian Pine (Pinus nigra)**

*Height: 40'-90' Full sun, partial shade; variety of soils*

This very hardy tree features dark green needles and oval light brown cones. Grows in many different types of soils, like clay and sand.

(2) **Balsam Fir (Abies balsamea)**

*Height: 30'-80' Shade; moist to wet soils*

Fragrant, soft needles make this an excellent Christmas tree. A slow growing tree, adaptable to a variety of sites.

(3) **Black Spruce (Picea mariana)**

*Height: 40'-50' Full sun to shade; fine clay, loam and sandy soils*

Medium size tree has dense foliage with very short, blue-green needles. Does particularly well in low or wetter areas. Does best in full sun, but is shade tolerant.

(4) **Colorado Blue Spruce (Picea pungens)**

*Height: 30'-60' Full sun to shade; sandy to moist soils*

Drought resistant once established. Beautiful ornamental and Christmas tree. Excellent for windbreaks, soil stabilization, and wildlife cover. Slow growing.

(5) **Eastern White Pine (Pinus strobus)**

*Height: 70'-100' Partial shade; wide range of soils*

(6) **Northern White Cedar (Thuja occidentalis) (Arborvitae)**

*Height: 30'-50' Full sun to shade; moist to wet fertile soils*

Grows best in soils with a PH of 7.0 or higher. Very slow growing. Used as food by deer and elk. Wood is rot resistant.

(7) **Norway Spruce (Picea abies)**

*Height: 50'-80' Full sun to shade; wide variety of soils*

Moderately fast-growing. Graceful, pendulant branches with large cones. Used for windbreaks, wildlife habitat, and as an ornamental.

(8) **Red Cedar (Juniperus virginiana)**

*Height: 40'-50' Full sun; moist, well drained soil*

The species has dark green, scale-like needles, then reddish tinge in winter. Attractive reddish bark is visible in mature specimens. Very aromatic wood.

(9) **Red Pine (Pinus resinosa)**

*Height: 65'-100' Full sun; sandy to gravelly soils*

Fast growing pine on sandy soils. Valuable for timber, reforestation, windbreak and wildlife cover. Sheds lower branches as it matures. Long lived.

(10) **Tamarack, also known as Larch (Larix laricina)**

*Height: 40'-80' Full sun to partial shade; moist to well-drained soils*

A deciduous conifer with delicate needles that turn bright golden in the fall prior to falling off.

(11) **White Spruce (Picea glauca)**

*Height: 50'-80' Partial shade; variety of soils, moist soils*

Native to Michigan. Slow growing, long lived species. Retains lower branches making it excellent for wildlife cover, windbreaks and visual screening.

HARDWOODS

(12) **Black Walnut (Juglans nigra)**

*Height: 60'-90' Full sun; moist, fertile, well drained soils*

The nuts are excellent for wildlife and humans. Does not tolerate very wet or dry soils. Salt tolerant. Excellent timber. Fragrant resin.

(13) **Cottonwood (Populus deltoides)**

*Height: 80'-100' Full Sun; moist, non-clay soils; tolerates flooding*

Fast growing cottonwoods are used to provide quick shade. Cottonwoods often reach 3'-4' in diameter during their 80 year life span.

(14) **Hybrid Poplar (Populus X canadensis robusta)**

*Height: 50'-70' Full to partial sun, all types of soil*

The Hybrid Poplar is a fast growing shade tree also called a Seedless Cottonwood. Some fast growing trees are short lived, but not the Hybrid Poplar. It will grow 6-8 feet a year.

(15) **Red Maple (Acer rubrum)**

*Height: 50'-70' Shade; wide range of soils*

Fast-growing tree, also referred to as “soft maple.” Wood used for pulp and low grade lumber. Bright red fall foliage.

(16) **Sugar Maple (Acer saccharum)**

*Height: 60'-100' Shade; moist, fertile to sandy soils.*

Also referred to as “hard maple.” Used for quality lumber, veneer, and maple syrup production. Golden yellow foliage in autumn. Salt tolerant.

(17) **White Birch (Betula papyrifera)**

*Height: 40'-65' Full sun; well to poorly-drained soils*

Commonly known as paper or canoe birch. Fast-growing, short-lived tree with creamy-white bark. Beautiful yellow autumn foliage. Salt tolerant.

(18) **White Oak (Quercus alba)**

*Height: Up to 100' Partial shade to full sun; wet or dry soil*

White Oak will provide shade and habitat for wildlife. A long-lived tree, some reaching 500 years old. Not as susceptible to oak wilt as the red oak group.

Key

- **Native Species**
- **Preferred deer food and/or habitat**
- **Rabbit/squirrel food and/or habitat**
- **Attractive flowering**
- **Attracts butterflies**
- **Attracts birds**
- **Attracts bees**
(19) American Highbush Cranberry  (*Viburnum trilobum*)

Height: 3'-13' Full sun; moist to wet soils

Leaves turn a brilliant scarlet in autumn. Fruit persistent through winter making it a great food source for wildlife.

(20) Black Chokeberry  (*Aronia melanocarpa*)

Height: 2'-7' Full to partial shade; dry to moist soils

Fruit ripens to glossy black. Well liked by birds, bear, and deer. If planted in direct sunlight, autumn colors become lighter and fruit production increases.

(21) Butterfly Bush  (*Buddleia davidii*)

Height: 5'-10' Full sun; well drained soils

Fast-growing, easy to maintain. An excellent source of nectar for butterflies, hummingbirds and bees. Cut back in late spring after buds first appear.

(22) Chokecherry  (*Prunus virginiana*)

Height: 10'-20' shrub or tree; Full sun; many soils

Its quick growth, attractive white flowers in the and strong, sweet and almond-like aroma fragrance make it a great yard tree. Mammals and birds enjoy the dark-colored berries.

(23) Elderberry  (*Sambucus canadensis*)

Height: 3'-12' Full to partial shade; rich, moist soils

A stout, strong-growing shrub with white flowers (July), followed by purple-black fruits. Safe for human and wildlife consumption.

(24) Forsythia  (*Forsythia sp.*)

Height: 3'-9' Full sun to partial sun; various soil types

Brilliant yellow early spring flowers cover upright stems before leaves. Great for borders or specimen plant in landscape. Best blooms in full sun. Tolerates varied environmental conditions.

(25) Hazelnut  (*Corylus americana*)

Height: 6'-12' partial to full shade; dry to moist soils

Multiple-stemmed bush. Produces abundant nuts within 3-4 years after planting. Eaten by grouse, turkey, deer, and small mammals.

(26) Lilac-Late  (*Syringa villosa*)

Height: 12'-15' Full sun; wide variety of soils

Multiple-stemmed, non-suckering shrub. Forms thickets for wildlife cover. Drought resistant. Great for windbreaks and as a pollinator species. Flowers 1-2 weeks later than common lilac.

(27) Mountain Ash  (*Sorbus americana*)

Height: 12'-25' Partial shade to shade; wide range of soils

(Not a true ash, not susceptible to Emerald Ash Borer)

Slow-growing with beautiful white flowers. Orange-red fruit persistent in winter and eaten by many songbirds.

(28) Nanking Cherry  (*Prunus tomentosa*)

Height: 6'-8' Full sun

Easy to maintain, bears up to 8 quarts in July. Tangy flavor like that of sour cherries.

(29) Nannyberry  (*Viburnum lentago*)

Height: 13'-23' Partial shade; moist to wet soils.

A moderately fast-growing shrub with beautiful flowers (May/June). Abundant fruit eaten by birds and small mammals.

(30) Ninebark  (*Physocarpus opulifolius*)

Height: 5'-8' Full sun to part sun; medium to dry soil; drought tolerant

1-2" white or pink flower clusters appear from spring through mid-summer. The multicolored, peeling bark provides winter interest.

(31) Red-Osier Dogwood  (*Cornus stolonifera*)

Height: 7'-10' Full to partial sun; moist to wet soils

Fast growing and spreading. Beautiful deep red bark, good food and cover for wildlife such as deer, bear, birds, and small mammals.

(32) Roselow Sgt. Crabapple  (*Malus sargentii*)

Height: 8'-12' Full sun; very sandy soils

Excellent for windbreaks. Showy flowers with persistent fruit. Abundant food and cover used by birds and mammals.

(33) Rose of Sharon  (*Hibiscus syriacus*)

Height: 8'-12' Full sun; well drained, moist soil

Blooms late summer and into fall, don’t be alarmed if other plants are leafed out and this shrub is not leafed out.

(34) Serviceberry  (*Amelanchier canadensis*)

Height: 10'-20' Partial shade; moist, fertile to dry soils.

This tree is one of the first to flower. Fruit is widely used by wildlife and is also edible by humans. Grows as tall as 20 ft. on the best soils.

(35) Winterberry Holly  (*Ilex verticillata*) aka. *Michigan Holly*

Height: 5'-10' Full sun; moist soils

Densely branched shrub with waxy foliage and bright red berries makes a desirable native landscape plant. Deciduous.
SMALL FRUITS

BLUEBERRIES

RED RASPBERRIES

#37. **Latham** The fruit is a red raspberry, rounded, two centimeters long and broad, maturing from July through September. High vigor, reliable yields and extreme hardiness make this a popular raspberry in the Midwest.

STRAWBERRIES

TREE CARE PRODUCTS

#39. **Tree Tubes:** Corrugated tubes to wrap around your trees to protect from animal damage. Tubes are 4ft tall and expandable.

- 1 tube $3.50
- 5 @ $3.45ea.
- 10 @ $3.35ea.
- 25 @ $3.20ea.
- 50 @ $3.00ea.
- 100 @ $2.75ea.

#40. **Tree Weed Mats:** Plastic mats 2’X 2’ to be placed around your trees or plants for weed control.

- $3.00 ea.

#41. **Marking Tape:** Bright, colorful tape to mark your new plants, protect from the mower, or mark type of plant.

- $3.00 roll

#42. **Marking Flags:** Mark your planting rows with these bright, wired flags.

- Bundle of 100 for $15

Plantskydd Products

Organic repellent, effective against deer, rabbits, voles, elk, moose, chipmunks, squirrels, nutria, opossum and beaver. Rain resistant, no need to re-apply after every rainfall. Safe for use in vegetable gardens and fruit trees. Plantskydd has a built in fertilizer.

#43. 1 Quart Spray….. $22    #44. 1lb Granular .....$13    #45. 1lb Powder Concentrate…..$27

FRUIT TREES $22 EACH OR 5 FOR $95

#46. Aztec Fuji Apple - With the juicy, sweet crunch of a Fuji, Aztecs have some of the reddest skin seen on apples, coloring to a full red. Ripens in mid-late October.

#47. Braeburn Apple - Juicy sweet-tart flavor and red skinned fruit with the characteristically "tall" Braeburn shape. An all purpose apple. Late season variety. Zones 5-8.

#48. Cortland Apple - This productive tree bears gorgeous ruby red apples with a snowy center that won’t brown in salads. Also perfect for pies and cider. Cold-hardy. Ripens in mid-Sept. Zones 4-6.

#49. Gibson Golden Delicious Apple - This vigorous, productive variety russets less than other yellow apples. An all purpose apple, but especially good for baking and sauce. The sweet and juicy fruit ripens in late September.

#50. Honeycrisp Apple - The crunch, texture and long storage life of Honeycrisps make them a good choice for a home orchard. Winter-hardy trees are reliable annual producers. Ripens in September. Zones 4-8.

#51. Manchurian Crabapple - Manchurian Crab is a beautiful white spring flowering crab and makes a nice addition to the landscape. Dense, spreading habit. Its fruit hangs on well after fall. Long bloom season makes it a great pollinator. Zones 3-8.

#52. Ruby Mac Apple - The fruit colors early with a deep red hue. A hardy and productive tree, it is sometimes used as an understock for other apple varieties. Great for eating and baking. Ripens in September. Zones 4-7.

#53. Wolf River Apple - Tree is strong and disease-resistant to apple scab, fire blight, and powdery mildew. Large fruit is perfect for cooking and sauces. Cold hardy, ripens late September. Zones 3-8.

***This is a hard to get premium apple with special pricing and is not part of the quantity discount.

#54. Blackgold Sweet Cherry — A self-pollinating dark sweet cherry that ripens in July. Used fresh or for canning and pies. Blackgold is late blooming, tolerates some frost and is a suitable pollinator for late-blooming varieties. Zones 5-8.

#55. Montmorency Cherry - A common tart cherry used for processing. Fruit is bright red with clear yellow flesh inside. Used for desserts, pies and canning. The tree is early bearing, productive and self-pollinating. Ripens in July. Zones 4-8.

#56. Blake’s Pride Pear - Has a rich taste and aroma, skin is golden. Fruit is juicy and has buttery texture. Fire blight resistant, heat tolerant, full sun. Ripens in September. Zones 5-9.

#58. Reliance Peach - Bright yellow flesh is bursting with flavor. Skin is red splashed over yellow. Medium to large freestone fruit is good for canning, freezing and fresh eating. Self-pollinating. Ripens in August. Zones 4-8.

#59. President Plum - Large, late ripening blue/black fruit with yellow flesh. President is winter hardy and can be used for desserts, canning and baking. Self-pollinating. Ripens in late September. Zone 5-8.

#60. Santa Rosa Plum - Fruit is sweet and juicy. Red skin with yellow flesh. Excellent quality fresh from the tree or in jams & jellies. Ripens in mid season. Zone 5-9.

Don’t Forget
Pick up tree tubes to protect your investment.
Do you need insect and critter repellent? We have it!!
Let us know if there is something we need to carry for next year.
Mark your calendars for pickup at Tawas Inn on April 27—29.

Hunter Access Program Available in Iosco County
Get paid for your hunting land!
Iosco County landowners can receive payments for allowing hunters to use their property. Hunter Access Program (HAP) is a voluntary land leasing program. The DNR leases land from private landowners to provide additional hunting areas for hunters. Private landowners determine if all hunters, or youth and apprentice hunters only, may hunt on their property. They also determine if hunters may harvest deer only, small game only, all legal species, or a combination of any of these options. Property owners specify the maximum number of hunters allowed on the land at any one time. Enrolled lands can be found throughout lower Michigan and a portion of the eastern Upper Peninsula.

Find more HAP information at www.michigan.gov/hap or at the ICD website: www.ioscoconservation.org.

FOREST PEST ALERT—OAK WILT
DO NOT prune oak trees during the growing season, between April 15 and July 15. DO NOT move firewood: oak wilt is spread by the movement of infected wood.
Call the ICD office if you suspect you see oak wilt on your property.
